AI. in 2020

A year writing about Artificial Intelligence

Jair Ribeiro

About this book

This book collects the best articles about several artificial intelligence concepts that I have published online during 2020. It is dedicated to anyone interested in Artificial Intelligence and anyone who wants to understand some of the building blocks that form this fascinating technology.

Here, you will find my best articles, updated and revisited, with some more insights, with a suitable format for book readers. The content of this book results from extensive research, long nights of studies, and some of my best years of work in the field in some prestigious enterprise companies in Europe.

My goal is to share as much as possible through an affordable, simple, and straightforward language, valuable knowledge that helps you understanding complex topics related to technologies such as Machine Learning, Deep Learning, Analytics, and Autonomous Vehicles, among others.

It is a satisfying adventure, I must say. Every day I receive considerably positive feedback, lots of article views, lots of likes, retweets, and more on my social networks and not less, some indications as a top writer, invitations to collaborate in some prestigious online publications. All this is truly motivating.

I believe that life is complicated enough, so I consider that every time someone tries to simplify concepts and knowledge useful to humanity, this can be regarded as an essential contribution to inclusiveness and equity in the world. So, this is my mission.

This book is not intended to exhaust all the learning needs of those wishing to enter the AI world. It is a starting point composed of some "scattered notes" that will help you put together some valuable pieces of technology's great mosaic.

The articles presented here are very beneficial to provide you a practical introduction to some of the most important concepts that many of us face daily.

They also will give you some pointers on how to go beyond the first step in search of much more.

Because just as Dante suggested:

"You were not meant to live as beasts, but to seek virtue and knowledge."

Figure 1-a- Allegorical Portrait of Dante - Agnolo Bronzino - Public Domain

About this book 2
Index 4
Epigraph 17
Dedication 18
Acknowledgments 19
Maybe one day, a robot will steal your job… but there is something you can do today to avoid that. 20
The leaders of the future 21
So, what do you can do to keep your work in the future? 22
Stop everything you are doing and watch these five TED Talks on A.I. Ethics now. 24
How to Keep Human Bias Out of AI 25
Can We Protect A.I. from Our Biases? 25
The Era of Blind Faith in Big Data Must End 26
Machine Intelligence Makes Human Morals More Important 27
How to Get Empowered Not Overpowered 27
It's time for action 28
An easy guide to the history of Artificial Intelligence 29
Thirty-eight free courses to help you master the most in-demand job skills in 2020. 36
Not only Hard skills… 42
Can "fake faces" Lead to the Illusion of Diversity? 46
A business opportunity 46
Inverting the roles: Not only A.I. faces but also A.I. beauty contests 48
Is it possible to use GANs for good today? 49
Fighting bias with GANs 50
Solving privacy issues with Synthetic data. 50

Conclusion 50
Can Artificial Intelligence predict the next pandemic? 52
But could this epidemic outrage be predicted? 52
A.I. as a disruptive wave in healthcare 53
Conclusion 54
Three intelligent apps that make you more productive today 55
Calendar 56
Habit—Daily Tracker 57
Things 57
Bonus app: Grammarly 59
Conclusion 59
The European Commission has its Ethical Guide on Artificial Intelligence. Why does it matter? 60
Building a trustworthy A.I. 61
The seven principles 61
Why do we need an open debate about A.I.? 62
We should learn how to collaborate with robots before it is too late. 63
Automation and the future of work 64
Entering the era of integration between Humans and Machines 64
Technical capacity: we must understand how machines work and continuous learning about them. 64
Data capacity: we must learn how to analyze and interpret information generated by machines. 65
Human capacity: developing the fundamental human capabilities that machines cannot imitate, or soft skills 65
How to cooperate and collaborate with machines at work 66
Three facts to consider if you think that A.I. will take your job. . 68
A.I. and the future of jobs 68
Job Created by Artificial Intelligence 69

What's the future between Humanity and the Machines? 70
A mini-guide to the E.U.' 's new Artificial Intelligence and Data Regulation plan 71
Artificial Intelligence is the future. 73
No facial recognition ban, for now. 73
Data is the new oil for Europe. 74
Europe also wants to assess the potential risks of Artificial Intelligence. 75
Conclusion 75
Five amazing books about AI that you should be reading 76
The Book of Why: The New Science of Cause and Effect 77
How to Create a Mind: The Secret of Human Thought Revealed 78
Life 3.0: Being Human in the Age of Artificial Intelligence ... 78
The Emotion Machine: Commonsense Thinking, Artificial Intelligence, and the Future of the Human Mind 79
Artificial Intelligence: A Modern Approach 80
Conclusion 81
Here is The Vatican’s plan for the development of ethical AI. ... 82
Towards an “algorithmic ethics.” 83
The prospect of a good AI 84
For an ethical AI development 84
Conclusion 85
How I am summarizing the most relevant terms of Artificial Intelligence from Wikipedia, using AI. 86
Why Text summarization matter? 87
Different approaches to Text Summarization 88
Steps involved to create the text summary 88
Summarizing the articles 90
How I collected the data? 90
Summarizing A.I. Articles using A.I. 91

Article Summarization tool using NLP 91
Why Text summarization matter? 92
Different approaches to Text Summarization 92
Steps involved to create the text summary 93
Using Transfer Learning for summarizing the articles 94
Colorizing Black & White images with Deep Learning 96
The Deep Learning approach. 97
Working with the LAB 98
Conclusion 99
Links and Sources: 100
The Ethics of AI and Autonomous Vehicles 101
From Asimov and beyond 102
Some examples of ethical issues and self-driving vehicle dilemmas 103
What about children and autonomous vehicles? 104
Are humans predictable? 105
The AI ethics issues and our responsible future. 106
Conclusion 106
An Introduction to Autonomous Vehicles 108
We will be driving in a better world. 109
Learning by doing: Home-made autonomous driving systems 109
What are autonomous vehicles? 110
Not every Autonomous vehicle is made equal: the six levels of autonomy 111
How do autonomous vehicles work in practice? 112
The technology behind autonomous cars? 113
The Hardware 113
Stereoscopic camera 113
Infrared camera 114
Radar 114

Sonar 114

Epigraph

"Your time is limited, so don't waste it living someone else's life.

Do not be trapped by dogma - which is living with the results of other people's thinking.

Do not let the noise of other's opinions drown out your inner voice.

And most important, have the courage to follow your heart and intuition.

They somehow already know what you truly want to become.

Everything else is secondary."

Steve Jobs
